

Team name	Guides
Members	Lei Teng, Orgil Sugar, Xinyang Yuan, Timothy Ewing, Jorit Pfleiderer, Tate Ryan
Description	A guide website which helps people to find/match a local guide by their specific requirements such as budget, dates, destinations. Local guides will also input their cost range
Vision statement	Experience the world
Motivation	Makes people travel and experience the world more efficient and more cost-effective. Everyone can travel around the world within their budget while finding the perfect guide for them. It also helps to narrow the gap between different regions of people.
Risks	<ol style="list-style-type: none"> 1. Lack of experience of the team in the area of focus 2. Reliable guides 3. Traveler's interest differs from guide's
Risk Mitigation Plan	<ol style="list-style-type: none"> 1. Learning how to work in a team, also become more comfortable with languages and data 2. Require an identifying documentation from guides 3. Character defining survey from guides
Version control	Github repository: https://github.com/leiteng7/CSCI3308-SP18-Guides.git
Development method	Since the project idea is to build a bridge between user and local guides. We will use waterfall method for this
Collaboration Tool	Slack
Proposed Architecture	<p>Front end: we will use HyperText Markup Language/ HTML/which tells browser how to display contents of the web pages</p> <p>Back end: We will use python in places where users have no access.</p> <p>Database: Pandas.</p> <p>Caching server: Apache</p>
