

# Milestone2

1. Project management tool: we use Trello for project management

## 2. Project Requirements

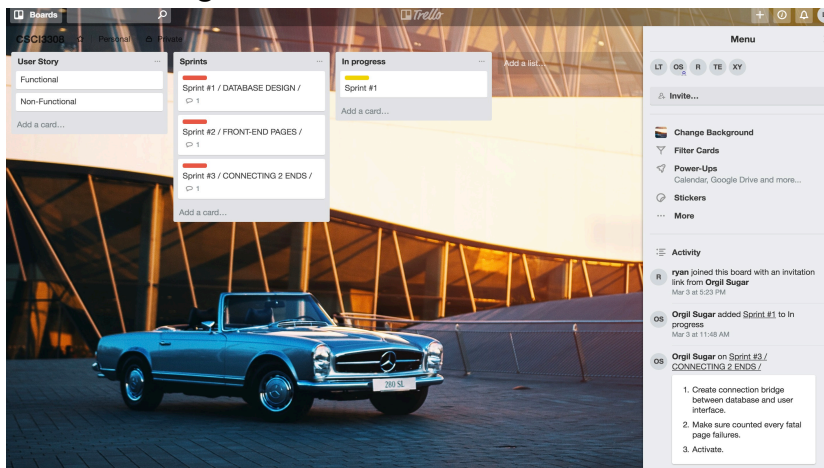

### Database:

- The database will maintain a record of all guides:
  - Name
  - Contact info
  - Price
  - Location
  - What they are showing
  - Rating
- We will write an algorithm for listing guides near a given location:
  - Sort by different criteria
  - Filter results
- We will maintain logs of changes to the database.

### Frontend:

- Search database
  - Sort using database algorithm
- View specific guide pages
  - Name, Contact info, etc.
  - Profile picture
  - Rating
- Become a guide page
  - Make new guide entries
- Homepage
  - Top 10 best places to visit, suggested

## 3. Management in tools

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R
1		Feb 5 - 11	Feb 12 - 18	Feb 19 - 25	Feb 26 - Mar 4	Mar 5 - 11	Mar 12 - 18	Mar 19 - 25	Mar 26 - Apr 1	Apr 2 - 8	Apr 9 - 15	Apr 16 - 22	Apr 23 - 29	Apr 30 - May 4	May 7 - 9	C		Completed on time

18	Survey page							IP										
19	Input page							IP										
20	Connection page							IP										
21	User&Guide account																	

## 4. Agile Scrum

Date: March 11, 2018

Attendees: Lei Teng, Xinyang Yuan, Orgil.S, Tim, Jorit Pfleider

What we have done after last meeting:

Self-learn HTML and start to do the home-page design

Starting work on the database

Get some low key databases

Things to be finished before next meeting:

Tim - continue working on the database

Orgil - Welcome Page / Asks user if they're user or guide or guest /

Jorit Pfleiderer - do the guest page where they can search some queries

Lei Teng – User Page

Xinyang – Guide Page

These are the assigned web-page design

Obstacles:

- impeding progress are that we have other classes w midterms
- for database, users and guides may have same first name or last name
- for integration, we have to self-learn how to connect the frontend and the backend
